

## TRAINING DAY:

# Paving the future: Innovations in asphalt and road construction

**Thursday 11 September 2025**

at the AK Bell Library, Perth and Breedon Clatchard Quarry, Newburgh

The Scottish Branch of the Institute of Asphalt Technology are pleased to announce a training day to be held on Thursday 11<sup>th</sup> September 2025. This training day is developed around our new president's vision for the IAT – ***Community, Collaboration and Curiosity.***

The training day is split into two parts, the morning session will focus on innovations in asphalt and road construction and will look at new technologies in the fields of health and safety, paving, materials and quality control technology, underpinned by considerations around decarbonisation – and how we need to collaborate and share best practice on these technologies if we are to achieve our collective goals as an industry.

This will be followed in the afternoon by a unique opportunity to visit the Breedon Group's Clatchard facility, for a guided tour of the quarry, asphalt plant, laboratory and an opportunity to get up close with some specialised paving equipment. This is a superb local opportunity, kindly organised by our friends at Breedon, which should not be missed!

This is sure to be another excellent IAT driven opportunity to obtain some first class, relevant CPD for you or your staff. Numbers are limited for this event, so please don't delay booking! Lunch will be provided, also included is bus transfer between the AK Bell Library and Clatchard Quarry. **Please note that you will need to bring safety boots, hard hat, safety glasses, gloves and Hi-Viz trousers and jacket for the site visit.**

What does it cost?

**The Institute of Asphalt Technology**  
PO Box 15690, Bathgate, EH48 9BT
